

Product selected: F16W/830

A new generation of special length triphosphor coated fluorescent tubes. Using triphosphor tubes in place of T12 and T8 halophosphor tubes increases light levels, and extends lamp life, up to 20000 hours when used with electronic control gear, improves colour rendering performance and reduces maintenance and energy costs.

Applications

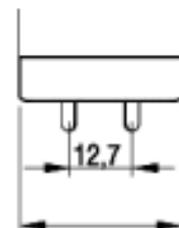

- In luminaires of non-standard lengths
- In display areas, furniture lighting, shops, bathroom luminaires etc.
- Wherever excellent colour rendering and performance (lm/W) are demanded

Features

- High light output; almost constant lumen maintenance throughout life
- High colour rendering (Ra85/Class1B)
- Consumes 10% less energy than comparable 38mm fluorescent tubes
- Excellent performance (lm/W) and increased luminaire efficiency (5 to 10%)
- Operates on conventional and electronic ballast
- The best choice for new installations and tube replacement
