Top Features

- Get full control over who goes in and out of your house
- Key less entry gives you one less thing to remember as you go out
- 4 ways of entry- Fingerprint access, keypad code access, standard keys access and touch card access
- Send unique key codes to give people entry for hours, days or weeks. Get notifications when your friends and loved ones use their key code, so you know they have arrived home safely

Get full control

The ENER-J Smart Wi-Fi Door Lock puts you in full control of your front door, allowing you to lock and unlock your door from your smartphone via ENER-J's secure Wi-Fi App. Gain entry with a key card or key tag that can be sent to your family and friend's smartphones - great if you're outside and won't hear the doorbell, or if you're expecting lots of people.

Keyless entry

It can be annoying rummaging around in your bag to find your keys at the end of a long day. Say goodbye to the hassle of missing keys and open your smart door with your smartphone, key card or key tag. You can even get notifications when a key card or tag is used, so you know your loved ones have got home safely.

Specification	
Design	Aluminum alloy die casting & Paint & IML process Cover plate
Physical Size	260*60*24.5mm
Total Weight	1kg
Color	Dark Grey

Characteristic		
Main hardware	CPU	ST_ARM® Cortex™-M0
	Fingerprint sensor	Support
	Screen (LCM)	No
Communication and network	Wi-Fi	Support (802.11 b/g/n @2.4GHz)
	Bluetooth	No
	Zigbee	No
	NB-iot	Support
Interface	Emergency power supply	Support
	Recognition by Camera	No
	Audio output	Support
	Breathing lamp of the handle	Support
Push-button type	Touch digital keypad	
Level of the key	C	
Mode of clutch	DC motor	
Battery	Quantity	4
	Nature	Alkali dry battery
	Spec	4.5V - 6.5V
	Standby time	More than 10,000 hours
Types of the door	Wooden door	Support, compatible 6052 lock
	Security door	Support, compatible 6053 lock
	Steel door	Support, compatible 6054 lock
	Room door	Support, compatible 6055 lock
	Villa Door	No
Unlocking method	Fingerprint	Support
	Password (PIN)	Support
	NFC card	Support (frequency:13.56MHz; Reading distance:above 6-15mm; Unlocking time:1-2ms)
	Key	Support
	Management software	Support
	APP	Support
	Cloud platform	Support Amazon & Alibaba
The thickness of the door	4-10 CM	
The opening and closing ways of the door	Open door from left	Support
	Open door from right	Support
	Open door from inside	Support
	Open door from outside	Support

Other function	Anti-theft via Cat eye	No
	Open door via ID card	No
	Combinatorial unlocking mode	No
	Anti-peep	No
	Fictitious cipher	Support
	Temporary Password	Support
Other parameters	Alarm when low voltage	Open about 50 times after alarm
	Password protection	Locking the lock 180s if 5 times wrong
	Alarm Mode	Bell ring
	Anti prying alarm	No
	length of the password	6 - 8 number
Electrical properties	Static standby power	<50uA
	Operation power consumption	Average <150mA/H
Environmental requirements	Temperature requirement	Working temperature:-30C~+55C, Storage temperature:-35C~+60C
	Humidity requirement	No more 90%
	Reliability and certification requirements	Contact 8+/-kV, Air +/-15kV
	Certification	CA

Power supply

4 pcs AA batteries
(Not included)

Overlength standby, standby times up to 20 thousand hours

Equipped

with USB emergency charging port.
You can emergency charge and open the smart lock for the emergency situation, like the batteries run out, forget the key, etc.
